INLAND MARINE RENEWABLE ENERGY

INLAND MARINE RENEWABLE ENERGY

**TOKIO MARINE
AMERICA**

Tokio Marine America's inland marine specialists focus on a wide range of inland marine exposures, including renewable energy equipment. With keen insight into this industry, specialized forms and a strong corporate commitment, we are uniquely poised to be an excellent choice as an insurance provider.

Tokio Marine America's renewable energy product is designed to provide coverage for renewable energy generating equipment such as solar panels. We provide an inland marine solution to equipment that is sometimes insured by a commercial property policy. However, our protection goes much further with extensions for loss of income earned from the sale of surplus electricity and expense to purchase power from a utility.

In addition, Tokio Marine is proud of our new alliance with the U.S. Environmental Protection Agency's Green Power Partnership! The Green Power Partnership is a voluntary program that encourages organizations to use green power as a way to reduce the environmental impacts associated with electricity use.

Our Inland Marine team consists of multi-dimensional industry specialists providing exquisite service to a hand-selected group of distribution partners.

APPETITE

Our Target Customers

- Solar Leasing
- Solar Installation
- Corporate Owners
